SCHÄFER IT-Systems – The specialists for IT infrastructure

SCHÄFER IT-Systems –

The specialists for IT infrastructure

SCHÄFER IT-Systems develops, designs and produces both standardised and customised data centre and water-cooled server rack solutions, based on our company's extensive and future-orientated expertise. In addition, SCHÄFER also supplies an extensive range of rack solutions for network applications. A comprehensive, practice-based range of components and accessories rounds off our product portfolio.

SCHÄFER IT-Systems –

Flexible in the extreme

Extreme flexibility, top-level service and advice, fast reaction times and permanent, close contact to our customers enable us to accomplish projects on time and at short notice. We have a large number of standard IT rack types permanently

in stock that can be delivered ex works within 48 hours. Accessories and replacement parts can usually be delivered within 24 hours. We can even supply individually configured IT racks reliably and punctually within 5 to 10 working days. And we don't simply forget about you after your order has been fulfilled. We remain in contact with you and are of course available to you at all times in case you have any questions or suggestions.

SCHÄFER IT-Systems –

part of a strong community

SCHÄFER IT-Systems is part of the internationally successful company SCHÄFER WERKE. The family-led group has its headquarters in Neunkirchen in Germany's Siegerland region. The work of all the SCHÄFER WERKE business divisions – SCHÄFER IT-Systems, SCHÄFER Industrial Solutions, SCHÄFER Interior Systems,

SCHÄFER Container Systems, SCHÄFER Perforated Metal, EMW Steel Service Centre – is based on high-quality fine steel sheet. The processing of this material is one of the core competencies of this enterprise.

The big PLUS for SCHÄFER IT-Systems

- + Products "Made in Germany"
- + All products with this label in Light Grey RAL 7035 belong to our Express range

SCHÄFER IT rack solutions – all the benefits at a glance

- Frame profile load-bearing capacity of up to 1000 kg

- Flexible extension and baying

- All types (SP20/SP54/PX) compatible for baying with each other

- Protection classes up to IP54

IP54 protected

- Highest levels of locking security

- All-round accessibility

- Can be totally dismantled

- Server rack centre profiles and 3 mounting plane depth levels ensure variability

- Impact-proof powder coating in light grey or black

- Complete product range from high-end to economy solutions

- Cold / Warm aisle solutions

- Water-cooled server rack solutions

SCHÄFER IT Racks – System comparison

SCHÄFER IT Rack solutions are as different as your needs and requirements! Two systems with a different focus in terms of security, internal design and air-conditioning, together provide the basis for a series of racks that, with the available equipment, meet your demands exactly.

SP20 Smart Profile

With two depth-adjustable 482,6 mm (19") planes, this practical rack is ideal for server rooms.

- Optimal accessibility
- Swinghandle with 2-point locking system
- Demountable
- Frame profiles with high load-bearing capacity of up to 1000 kg
- In RAL 7035 smooth finish or RAL 9005 fine structure

IP54 protected

SP54 Smart Profile

Air-conditioning without limits

SP54 racks provide the best conditions for blending all relevant technologies into complete IT infrastructures. Each rack makes an important contribution to the physical security of your IT infrastructure and operates as the interface for ground-breaking air-conditioning concepts.

- IP54 protection rating
- Optimal accessibility
- Swinghandle with 4-point locking system
- Demountable
- Frame profiles with high load-bearing capacity of up to 1000 kg
- In RAL 7035 smooth finish or RAL 9005 fine structure

PX – The Excellence Range

The rack with the individual touch. Specially developed for price-conscious customers, these network racks are an interesting addition to SP20 racks, thanks to their new frame design.

- Optimal accessibility
- Swinghandle with 1-point locking system
- Demountable
- Frame profiles with high load-bearing capacity of up to 700 kg
- In RAL 7035 smooth finish
- Doors possible on all four sides

Creating space and clarity for data networks and data centres – with rack solutions from SCHÄFER

The ergonomic, modern design of SCHÄFER's steel SP Racks (Smart Profile) is what makes them really outstanding. They are functional, easy to maintain, strong, easy to operate and offer long services lives. Available with protection ratings up to IP54 and as network or server racks, these models offer you great potential for achieving optimal protection for your IT facilities.

Complete rack security with IP54 protected for reliable dismantling, extending and baying!

Door opening:
stand alone 180°,
baying 135°

The development of the SCHÄFER SP Rack System is the practice-oriented response to the permanently increasing demands placed on data, server and network technology.

Tailor-made standard, modular solutions are also an effective way of saving your time and money. In keeping with this principle, SCHÄFER IT-Systems has a wide product range on offer which also provides great scope for individual solutions:

- Pre-assembled complete racks in two standard colours as especially economic solutions, available at short notice
- Individually configured customised versions in all usual dimensions, delivered in the shortest possible time

Besides their modular design and flexibility, all SP Racks offer cutting edge advantages for users and comply with the latest international standards, IEC 297-1/2 (19") and IEC 917-2-1 (metric), as well as DIN EN 60721-3-3 and DIN 60068-1 (IEC 68-1).

The multi-profiled basic frame is very strong and yet lightweight. Integrated 25 mm pitch patterns on all sides allow system accessories to be installed easily and economically.

Baying solutions combining SP Racks with PX Racks are possible

Doors and side panels can be removed and replaced very quickly to guarantee all-round access. The rack's excellent one-colour design in either RAL 7035 (light grey) or RAL 9005 (black) blends harmoniously into any environment.

Useable internal dimensions between frame sections:

- 491 mm on racks with widths of 600 mm
- 591 mm on racks with widths of 700 mm
- 691 mm on racks with widths of 800 mm

External dimensions (without SW)

- 593 mm on racks with widths of 600 mm
- 693 mm on racks with widths of 700 mm
- 793 mm on racks with widths of 800 mm

The SP Rack consists of steel frame sections joined together by means of corner connectors. Dismantling can be carried out in a few simple moves, allowing the rack to be erected in any room without any difficulty

Flexible modules: fully assembled, variable and exchangeable, easy to extend.

Top cover panel with brush strip for easy cable entry

Brush strip and fans can be retrofitted optionally

Passively vented top cover panel provides mechanical protection combined with passive rack ventilation

Top cover panel with active fans and brush strip provide optimum rack ventilation while minimising noise emissions

Load bearing capacity of 19" mounting planes

With 2 depth stays	(per side)	max.	500 kg
With 3 depth stays	(per side)	max.	700 kg
With 4 depth stays	(per side)	max.	1000 kg
With 4 cross supports		max.	400 kg
With 1 additional depth stay	(per side)	max.	700 kg
With additional rectangular tube	(per plane)	max.	1000 kg
With 4 corner brackets	(per side)	max.	700 kg
With 2 bridges	(front/back)	max.	1000 kg

Complete accessories:

Clearly allocated and packaged ready to be installed

- Especially for upgrading or extension of the SP Rack
- General accessories for interior fitting, power supply etc.

Professional reliability and attractive design

The removable side panels are slotted into place, screwed fastened (quick-fastening system) and secured by a lock. They can also be left in place to serve as partitioning walls in baying solutions

Front and back doors are equipped with pivoted handles and security lock, or can be exchanged for a profile half-cylinder or any other standard locking system on request

SP20 Rack – Equipped for convenience and maximum security

- High-grade steel racks (light grey RAL 7035). Profile technology guarantees maximum stability
- Fully assembled with basic accessories
- Flexible interior - designed to accommodate all currently available IT components
- Simple to assemble and disassemble – all racks are „demountable“
- Accessible from all sides (removable doors and panels)
- Can be used as stationary or mobile units
- 100 % modular system, can be extended at any time
- Extremely strong frame with load bearing capacity of up to 1000 kg; higher load bearing capacities available on request

Material:

- Basic frame: 2.00 mm steel sheet, multi-profiled
- Doors: 1.25 mm steel sheet with multi-folded edges and 3 mm single pane safety glass panel (front door only)
- Side panels: 1.00 mm steel sheet
- Plinth: 1.25 mm steel sheet
- Top/bottom cover panels: 1.25 mm steel sheet
- 482.6 mm (19“) mounting angles: 2.00 mm steel sheet

Finish:

- Basic frame, doors, side panels, plinth, top/bottom covers: high-quality powder coating in light grey RAL 7035
- Installation kit for 482.6 mm (19“) mounting angles: galvanised

Locking:

- Doors: standard pivoted handle with security lock, prepared for installation of a profile half cylinder or other standard lock, 2-point locking system
- Side panels: sash fastener with security lock, slot-in, quick-fastening system

International standards:

- IEC 297-1/2 (19“)
- IEC 917-2-1 (metric)

Scope of delivery				
Basic frame	1	1	1	1
Front door with safety glass panel	1	1	1	1
Steel rear door, solid	1	1	1	1
Side panels, screw-fastened, IP54	2	2	2	2
482.6 mm (19") mounting angles at front and rear	4	4	4	4
Depth stay	2	2	2	2
Top cover, single piece, solid	1	1	1	1
Bottom cover, single piece, with brush strip	1	1	1	1
Plinth, solid, with levelling feet, height: 100 mm	1	1	1	1
Also supplied				
Earthing kit	1	1	1	1
M6 cage nuts, 16 M6 screws, washers	50	50	50	50

Depth adjustable 482.6 mm (19") mounting angles offer maximum space for installing systems, sliding rails and shelves

The infinitely adjustable centre upright provides the central basis for the installation of all systems of differing depths optional accessories

Recommended accessories

- 482.6 mm (19") shelf, fixed
Order no. 6550600
- 24-outlet C 13 power strip
Order no. 7771630
- Side partition panel for heights of 2000 mm
Order no. 6782420

SP20 Rack system accessories (from page 70) and general system accessories (from page 88)

Light grey RAL 7035

SP54 – based IT Enclosures, Standard and Comfort

Standard with shelves

IT Enclosures

Basic frame with removable side-panels and glazed front door – single pane safety glass –, active ventilation and thermostat, sound insulation and mounted on castors for mobility.

- **Standard:** with shelves
- **Comfort:** with complete 19"-system installation (24 or 37 U)

Work stations in separate locations are increasingly being linked together in networks. SCHÄFER IT racks provide the ideal basis for IT infrastructures.

With this elaborate concept, which allows the installation of any IT components, such as servers, hubs, routers, switches and their wiring both for desktops and towers as well as for 482.6 mm (19") formats, a central enclosure can become the junction for the connection of numerous work stations.

All IT Enclosures consist of a basic frame, on which side panels, front glazed door and sheet steel rear wall can all be detached to guarantee free access for installation and maintenance. Swinghandle with security locks prevent unauthorised access. There are two fans mounted in the roof plate (can be extended to four if required. Installation holes are available) with a thermostat to counter thermal problems right from the outset. All IT Enclosures are provided with sound insulation (approx. 39 dB (A) for 2 fans).

Material:

- Basic rack: 2.00 mm sheet steel
- Doors: 1.25 sheet steel
- Glass: 3 mm single pane safety glass (SPSG)
- Side panels: 1.00 mm steel sheet
- Top/bottom cover panels: 1.25 mm steel sheet

Finish:

- Basic frame, doors, side panels, modules: high-quality powder coating in light grey RAL 7035
- 482.6 mm (19") mounting angles: galvanised

Locking:

- Doors: standard swinghandle with security lock or other standard lock, 4-point locking system
- Side panels: sash fastener with safety lock, additionally screw fastened

Useable internal dimensions:

- Rack height 24 U: (W x H x D) 491 x 1091 x 980 mm
- Rack height 37 U: (W x H x D) 491 x 1691 x 980 mm

Comfort with 482.6 mm (19") components

Retrofit ventilation kit with two fans, protective grille, cabling and fixing accessories
Order no. 7719300

The Excellence Range – PX Racks from SCHÄFER

In this range, SCHÄFER offers classic network rack solutions and server racks in depths of 800 and 1000 mm and widths of 600 and 800 mm. Customers have the choice between extremely low-priced complete racks as convenient basic versions or solutions with rear doors.

II.

PX Rack

PX Excellence Range	34
PX Rack Complete Racks	36
PX Rack Configurator	38

PX Rack – The Excellence Range

These network and server racks, specially developed for price-conscious customers, provide interesting additions to the standard SP Rack range, thanks to their new frame design.

In this range, SCHÄFER can offer the classical network rack solutions as well as server racks in depths of 800 and 1000 mm and widths of 600 and 800 mm. The customer has the choice between extremely low-cost complete racks, which represent the basic, easy-to-use designs (with rear wall), or solutions including a rear door.

Many of the complete racks can be delivered ex works.

In addition to complete racks, fully customised configurations are also possible, providing the perfect basis for specific projects.

The PX Rack also has the same important assembly benefits – such as the capability of „halving“ the frame – that make all

SCHÄFER racks so outstanding. This allows easy installation in any location and the rack can be assembled and mounted by one person working alone.

The frame is extremely strong, with a load-bearing capacity of up to 700 kg.

The efficiently designed interior allows 43 height units (U) to be used in the classic two metre PX Rack!

PX Racks can also be bayed together with SP Racks.

Economical project solutions:

PX Racks offer especially good-value project solutions for baying racks.

Standard network technology system accessories can also be used for PX Racks.

Load-bearing capacity of the 19“ planes:

- 2 19“ installation kits = 400 kg
- 3 19“ installation kits = 600 kg
- 4 19“ installation kits = 700 kg

New:

- Doors can be installed on all 4 sides!

The sophisticated frame design enables doors to be mounted on all four sides of the PX Rack; SP Rack doors can also be used as surface-mounted doors

**PX Rack –
top cover**

*For 800 mm widths, it has 6 knockouts for fans and 3 for cable entry.
For 600 mm widths, it has 6 knockouts for fans and 1 for cable entry*

**PX Rack –
cladding elements**

Doors with and without single pane safety glass (SPSG) with pivoted handle, can be exchanged for pivoted handle (prepared for profile half-cylinder)

**PX Rack –
side panels**

Side panels slot into place at the bottom and are held in place at the sides by a sash fastener. Can also be used as a rear wall

**PX Rack –
depth-adjustable interior**

The 19" mounting angles can be attached to both sides of the depth stays. For 800 mm wide PX Racks, an adapter set is required for each 19" plane

Complete Solutions for Networks and Servers

Project and efficiency range with low-cost complete racks

- Models for maximum market coverage with 25 U and 43 U in heights of 1300 and 2100 mm respectively, depths of 800 and 1000 mm and widths of 600 and 800 mm
- Extremely strong framework with a load bearing capacity of up to 700 kg
- Frame is “demountable”
- High quality powder coating finish in light grey RAL 7035 on all cladding components
- All cladding, such as side panels and doors, can be removed in seconds
- Top cover panel prepared for brush strips and/or ventilators (for 800 mm widths, 6 knockouts for fans and 3 for cable entry. For 600 mm widths, 6 knockouts for fans and 1 for cable entry)

- Doors fitted with T-handles and locks, one-point locking system
- Plinths, 100 mm high (always mounted)
- Standard depth-adjustable 482.6 mm (19") mounting angles
- Extreme cost benefit

Material:

- Basic frame: 1.5 mm steel sheet, multi-profiled
- Cladding: 0.75 mm steel sheet

Finish:

- High-quality powder coating in light grey RAL 7035
- Galvanised 482.6 mm (19") mounting angles

Locking:

- Doors: T-handle with lock
- Side panels: sash-fastener with security lock

International standards:

- IEC 297-1/2 482.6 mm (19")
- IEC 917-2-1 (metric)

Configurator for 600 and 800 mm wide racks

With the PX Rack Configurator, customised rack systems can be put together directly from our standard modules. There are two ways of making up your own personal configuration: use our catalogue or consult our specialists at our back office. The rack will then be delivered fully assembled in the shortest possible time.

- Models for maximum market coverage with 25 U and 43 U in heights of 1300 and 2100 mm, depths of 800 and 1000 mm and widths of 600 and 800 mm
- Extremely strong framework with a load bearing capacity of up to 700 kg
- Frame is “demountable”
- High quality powder coating finish in light grey RAL 7035 on all cladding components
- All cladding, such as side panels and doors, can be removed in seconds
- Top cover modules prepared for brush strips and/or fans (for 800 mm widths, 6 knockouts for fans and 3 cable entry apertures. For 600 mm widths, 6 knockouts for fans and 1 cable entry aperture)
- Doors fitted with T-handles and locks
- Plinths always assembled, 100 mm high
- Standard depth-adjustable 482.6 mm (19”) mounting angles
- Side panels can be used on all four racks sides

Material:

- Framework: 1.5 mm steel sheet, multi-profiled
- Cladding: 0.75 mm steel sheet
- Glass pane: 3 mm SPSG

Finish:

- High-quality powder coating in light grey RAL 7035
- Galvanised 482.6 mm (19”) mounting angles

Locking:

- Doors: T-handle with lock
- Side panels: T-handle with security lock

International standards:

- IEC 297-1/2 482.6 mm (19”)
- IEC 917-2-1 (metric)

Configure your own customised rack

- 1 Determine basic frame dimensions (width, height, depth)
- 2 Select doors, 482.6 mm (19") angles, side panels and bottom modules

The completely assembled rack will be delivered in the shortest possible time.
System accessories can be found from pages 82 and 88!

Economical and easy to assemble – Wall Racks and Mini Racks from SCHÄFER

The NT Box Wall Rack was specially developed for small networks, sub-distributors and floor distributors.

III.

NT Box wall racks, NT Mini Rack

NT Box	42
NT Box Flat-Pack	44
NT Box 3-part units	46
NT Box Slimline	47
NT Mini Rack 18 U	48
NT Universal Rack	49

Economical and easy to assemble

- High-grade steel housing (light grey RAL 7035) complete with basic equipment
- Optimum accessibility for fast installation: once the door is open, the side panels can be pulled forward
- Mounted ready for installation, glazed door at front, inc. lock, 482.6 mm (19") mounting angles at front, cable entry apertures in top and bottom and cable management rails
- Individual units in separate transport packaging
- Depths of 400, 500 and 600 mm, from 6 – 21 U

The wall-mounted NT Box was specially developed for small networks, sub-distributors and floor distributors.

The major practical problem of accessibility is solved by the fact that the door can be very quickly removed once opened, allowing the side panels to be slid out forwards.

This way, the housing is easily accessible from three sides and allows all components to be installed easily.

To change the doors from left to right-hand opening, simply lift out the hinge pin and

replace them in the fixings provided.

Cable entry apertures with brush strips are fitted in the top and bottom panels and/or rear panel and can be replaced by flange plates on request. The side panels are passively ventilated.

The NT Box is available in 18 different sizes. The integrated 482.6 mm (19") mounting angles can be installed either at the front or rear and are depth adjustable.

All NT Boxes and the provided accessories follow the plug & play principle.

All NT Boxes can also be placed on the floor, whether they are fitted with feet or not.

Material:

- Framework: 1.25 mm steel sheet
- Door: 4 mm single pane safety glass panel
- Side panels: 0.75 mm steel sheet
- 482.6 mm (19") mounting angles: 1.5 mm steel sheet

Finish:

- Framework, side panels: powder coated in RAL 7035 light grey
- Galvanised 482.6 mm (19") mounting angles

Locking:

- Security lock (standard)
- Handle for a profile half cylinder (optional, see page 84)

Cable entry:

- Depth: 35 mm, length: 400 mm

Delivery comprises:

- 1 framework housing with 2 brush strips
- 1 door with lock and hinge mounting brackets
- 2 side panels with passive ventilation
- 2 x 482.6 mm (19") mounting angles, front
- 1 cable support rail
- Earthing kit, supplied

Load-bearing capacity:

- NT Boxes have a load bearing capacity of 3 kg per height unit

Useable internal space:

- Box depth minus 55 mm

Cable entry dimensions (D x W):

- 90 x 400 mm

After opening the door and removing the red securing ring, the door can be raised and removed easily. Then, the side panels can be slid out forwards without tools. When the door is closed, the side panels cannot be removed

For cable entry, every NT Box has brush strips as standard, which can be exchanged for flange plates with fans, if required

Each individual NT Box unit is delivered in its own high-grade transport packaging

In the rear panel, there is a cable support rail as standard for use with cable ties. Brush strips can be retrofitted as an option

Only the 19" 1 + 2U shelves can be installed in the Boxes as fixed or sliding shelves (depth: min. 500 mm)

NT Box system accessories (from page 84) and general system accessories (from page 88)

Practical delivery form and quick to assemble

Flat-Pack

The development of the flat-pack version of the NT Box is SCHÄFER's response to the growing logistics and assembly demands of network technology.

The base model consists of the SCHÄFER low-cost, modular, standard wall-mounted system with removable doors and side panels.

The flat-pack NT Boxes are designed to have the lowest possible packaging volume, while keeping the required assembly work to a minimum.

In only four steps, the complete distributor – either on the ground or wall-mounted – can be assembled by one person. Our standard range of accessories enables the Box to be extended as required.

- Economic efficiency: maximum saving of transport volume
- Economic efficiency: maximum saving of storage space, low space requirement despite model variety

- Cost effective and efficient assembly on site in only four steps and by only one person
- Easy installation and maintenance: removable doors and side panels guarantee optimum accessibility from all sides, standard accessories

Preparation for assembly: check that all individual parts have been delivered. The rear panel can be used as a drilling template. Mark the drill hole positions, drill the holes and attach the rear panel to the wall. Alternatively, the Box can be assembled on the ground

Slide the floor into the longitudinal slits provided and secure it with corner connectors, which are then fastened into place by screws

Erect the vertical stays and screw them into place

Place the roof on the top of the vertical stays and bolt into place. Insert corner connectors and screw them tight

Mount the 482.6 mm (19") angles in the required position and slide the left and right hand side panels into place. Then, install the glass door by inserting the hinge pin into the top drill hole first, before allowing the bottom pin to slide into the lower hole. Secure the door at the top with the red securing ring

NT Box Slimline

The Space Savers

- High-grade steel housing (light grey RAL 7035) complete with basic equipment
- Mounted ready for installation, glazed door at front, inc. lock, 482.6 mm (19") mounting angles at front, cable entry apertures at top and bottom, angled door with lock
- Individual units in separate transport packaging

The Slimline NT Box, designed for wall mounting with a minimum of depth, was specially developed for small networks, sub-distributors and floor distributors.

 Light grey RAL 7035

Material:

- Framework: 1.25 mm steel sheet
- Door: 4 mm single pane safety glass panel
- 482.6 mm (19") mounting angles: 1.5 mm steel sheet
- Angled door at rear, removable: 1.25 mm steel sheet

Finish:

- Framework, side panels: powder coated in RAL 7035 light grey
- Galvanised 482.6 mm (19") mounting angles

Locking:

- Security lock

Delivery comprises:

- 1 framework housing with 2 brush strips
- 1 door with lock and hinge mounting brackets
- Angled door with passive ventilation
- 2 x 482.6 mm (19") mounting angles for front installation
- Earthing kit, supplied

Load-bearing capacity:

- The Slimline NT Boxes have a load bearing capacity of 5 kg per height unit

Small but smart

- High-grade steel housing (light grey RAL 7035) complete with basic equipment
- Optimum accessibility for fast installation: once the door is open, the side panels can be pulled out forwards, enabling easy access from 3 sides
- Mounted ready for installation, glazed door at front, inc. lock, 482.6 mm (19") mounting angles at front, cable entry apertures in bottom cover and rear wall

The NT Mini Rack was specially developed for small networks, sub-distributors and floor distributors as a floor-standing unit.

Material:

- Basic housing: 1.25 mm sheet steel
- Door: 4 mm single pane safety glass
- Side panels, door: 0.75 mm sheet steel
- 482.6 mm (19") mounting angles: 1.5 mm steel sheet

Finish:

- Housing, side panels: powder coated in RAL 7035 light grey
- Galvanised 486.2 mm (19") mounting angles

Locking:

- Security lock

Delivery comprises:

- 1 framework housing with 2 brush strips
- 1 door with lock and hinge mounting brackets
- 2 side panels with passive ventilation
- 2 x 482.6 mm (19") mounting angles, front
- Levelling feet
- Earthing kit, supplied

Load-bearing capacity:

- NT Mini Racks have a load bearing capacity of 3 kg per height unit

NT Box system accessories (from page 84) and general system accessories (from page 88)

NT Universal Rack

All-round access

Universal rack with
482.6 mm (19") mounting plane

Component and cable accommodation with easy access from all sides

This practical universal rack, as a mobile or stationary open unit, can accommodate all 482.6 mm (19") components on 45 height units. The torsion-resistant frame made of 1.5 mm sheet steel with plinth is a very stable structure. Its all-round accessibility makes installation easy. All accessories from the SCHÄFER IT standard range are of course fully compatible.

2 mounting planes can be installed one behind the other.

All parts have to be ordered separately!

Finish:

- Powder coating in RAL 7035 light grey

Useable height:

- 45 U

Weight:

- Approx. 20 kg, 482.6 mm (19") mounting angle, approx. 13.5 kg
- Load bearing capacity up to 200 kg, with plinth
- Load bearing capacity up to 800 kg, when mounted on ground

External dimensions (W x H):

- 609 x 2092 mm

Base plate dimensions (W x D):

- External width 600 mm
- Depth: 700 mm

UNIQL lower section	6420520

The 5 Elements

- SP54 Rack
- Cooling System
- Rack Control
- Power Management
- Partnership Management

Please note: Pipe work and a cold water generator are to be provided by the customer. Air-intake temperature is regulated by RMS with integrated control. Operation and configuration via SNMP or http.

- Full integration as a compact unit
 - From 4 to 21 kW usable cooling capacity
 - 100 % circulating air operation
 - Thermally independent of the ambient air
 - Parts carrying cooling water in separate housing
- With UNIQL, SCHÄFER is systematically implementing the principle of a cooling system integrated in the server rack. The decision for integration is a logical step.

Argument 1: Energy efficiency

- Low pressure loss, pump rating correspondingly lower
- Long fan lifetimes as fans are not mounted in heated sections

Argument 2: Space efficiency

Server space is not unlimited! And through the trend to higher and higher computer performance accompanied by a greater packing density, server racks must guarantee a maximum of space efficiency. This enables the maximum computer density per m² of floor space to be achieved.

Comparison of floor space

- UNIQL (integrated cooling system),
floor area in mm (W x H x D): 800 x 2240 x 1200
- Server rack of 800 mm width with side cooling solution (300 mm),
floor space in mm (W x H x D): 1100 x 2200 x 1200

Floor space needed for 100 U

- UNIQL 1.92 m²
- Server rack 3.96 m²

Cooling Unit Features

1 cooling unit (self-supporting, insulated housing) installed in lower section of the UNIQL unit, consisting of:

- 1 high-capacity heat exchanger
- 1 electrically actuated 3-way valve
- 2 fans (electronically controlled)
- 1 fuse box

Technical features

- Protective housing for heat exchanger
- Maintenance during operation
- Automatic circuit breaker operated from front

Cooling Unit technical data

Operating voltage	230 volts
Power consumption	1.04 kW
Input current	6 A
Spread chilled water	12/18°
Max. air capacity	3500 m ³ /h
Water throughput rate	2.9 m ³ /h
Air supply temperature to server	21° C – 25° C
Dissipated heat	approx. 700 Watt (at 21 KW refrigeration capacity/20° C ambient temperature) approx. 300 Watt (at 7 KW refrigeration capacity/23° C ambient temperature)
Water connection for heat exchanger	3/4" external thread (from below)
Connection for condensate tray	5/8" hose connection
Pressure loss (water-side)	1 bar max. (inc. 3-way valve)
Operating pressure heat exchanger	10 bar
Coolant	water (optional: glycol mixture)

Water-cooled rack with heat exchanger below the server

The UNIQLE modular, water-cooled high-density Rack solution, gives you the perfect operating climate for your high-performance computers.

The heat exchanger at the bottom of the rack is supplied with cold water and provides up to 21 kilowatts of usable cooling capacity. The cooling-on-demand principle will supply the servers with precisely the cooling capacity needed to cover the server's thermal requirements by means of air circulation. Compared to static cooling systems, this leads to significant energy savings.

The UNIQLE system using 37 U to 58 U can be assembled on less than one square meter of space, depending on what is available.

This is possible due to the separation of the air-water heat exchanger and the SCHÄFER server racks (available in heights of 1800 to 2200 mm) into two units.

This way, UNIQLE combines high user-friendly availability with extreme energy efficiency.

Additional
12 U =
58 U

Black RAL 9005

Article no. for lower section, see page 58

Benefits at a glance

- Effective cooling allows maximum computer density
- Usable cooling capacity of up to 21 kilowatts
- Energy efficient due to reduced volume of equipment to be cooled
- High availability
- Integrated rack management system for permanent monitoring
- Increased fan service life, due to installation outside hot zones
- Load bearing capacity of up to 1.000 kilos
- IP54 protected
- Air-water heat exchanger and server rack as separate units → enables quicker and easier replacement of standard server rack (modular design)
- Low space requirement: footprint 800 x 1200 mm (space efficient)

LOOPUS – high efficiency, water-based side cooler solution for server racks

Please note: the customer must provide pipe work and a cold water generator

Cooling Unit Features:

1 cooling unit (self-supporting, insulated housing) installed in lower section of the UNIQLÉ unit, consisting of:

- 1 high-capacity heat exchanger
- 1 electrically actuated 3-way valve
- 5 fans (electronically controlled)
- 1 powerbar

Technical features:

- Maintenance during operation
- Fan operated from front

Article	Order no.
WIB 8000 (Network connection)	6430100
Sequencing cable	6430200
Splitter	6430300
Hose set (2 pieces)	6420270

Cooling Unit technical data:

Operating voltage	230 volts
Power consumption	915 Watt
Input current	4 A
Spread chilled water	12/18° depending on type
Max. air capacity	4000 m ² /h
Air supply temperature to server	21° C – 25° C
Water connection for heat exchanger	1" internal thread (from below)
Connection for condensate tray	hose connection
Pressure loss (water-side)	1 bar max. (inc. 3-way valve)
Operating pressure heat exchanger	10 bar
Coolant	water (optional: glycol mixture)

LOOPUS (DX) coolant-based on request

COLD SECTION – the flexible cold-aisle enclosure

COLD SECTION:

The solution for efficient cold/warm aisle separation

- Avoiding air short circuits
(warm and cold air mixing together)

Arguments:

- Economical solution
- Scalability of additional cooling (e.g. UNIQL or LOOPUS)
- Raised floor makes cooling capacity adaptable
- Easy assembly

Modular and flexible – SWAP PANEL 9

Flexible raised floor systems are now an integral part of modern data centre architecture. Access to the installations room must be possible at all times without disrupting operations.

Elevated floor systems must comply with certain essential criteria:

- 1. Walkability**
- 2. Accessibility**
- 3. Air flow capacity**
- 4. Cable routing**

As the grid dimensions of IT server racks normally deviate from standard elevated floor dimensions (600 x 600 mm), floor panels are often permanently blocked by the racks erected on them. Accessibility for cabling is no longer

sufficiently guaranteed, the cooling air from the elevated floor can no longer be guided precisely to the places where it is needed.

No modifications are possible during operation, the available free clearance has not been used to optimum effect.

The modular and flexible SWAP PANEL 9 elevated floor system from SCHÄFER IT-Systems now offers a range of different floor elements specially adapted to use in data centres. An innovative frame accommodates 9 tiles (each 200 x 200 mm) which can be adapted to very different functional requirements: standard and heavy duty loads, ventilation and cable routing. Breaking up the rigid 600 x 600 mm pattern makes precisely routed air circulation and cable routing possible.

SWAP PANEL 9 elevated floor elements are compatible with standard 600 x 600 mm elevated floor panels. So existing floors can be fitted with the new system quickly and flexibly.

Their high-quality graphite powder coating makes the tiles electrically conductive.

SWAP PANEL 9 complies with the European test and classification standard for floor systems (DIN EN 12825 raised floors and DIN EN 13213 hollow floors).

Fitting 9 ventilation tiles enables SWAP PANEL 9 to achieve free clearance of 60 %

Top cover panel with active ventilation

Top cover panel with active fans

The covers with ventilation fans provide optimum and economical air conditioning for all SP Racks. The number of fans can be easily extended by plug & play to a maximum of 6.
 Material: 1.25 mm sheet steel
 Finish: powder coated in RAL 7035
 Delivery comprises: 1 cover panel with two or 4 fans, inc. cables ready for connection, fixing accessories

Technical data:

- Operating voltage 230V
- Rated output 22/21 W at 50/60 Hz
- Aeration capacity per fan (free blowing) 162/195m³/h at 50/60 Hz
- Temperature range -20° C to +70° C
- Max. noise emission:
 1 fan 45/50 dB (A) free blowing

Thermostat order no. 6763000 must be ordered separately

Separate active fan with protective grill and fixing accessories, order no. 7719300 VE 2 units. Replacement fan without accessories, order no. 7719100

Top cover panel without active fans

Mains cable: 3 x 0.75 mm² cables, 2 m in length with two-pole schuko angled plug, and with IEC C13 plug, **order no. 6763200**

SP Rack

482.6 mm (19") mounting angles

For the installation of 482.6 mm (19") components over the full or partial rack height, these mounting angles can be installed either at the front or rear of the SP Rack. Additional positioning holes in the height unit (U) pitch pattern facilitate installation. According to your desired fixing method in the SP Rack, additional installation kits or cross supports must be ordered separately.

Material: 2.00 mm sheet steel, finish: galvanised
 Delivery comprises: 2/4/6 x 482.6 (19") mounting angles depending on type, fixing accessories

Height (mm)	Height (HE)	482,6 mm 19" angle		
		f	f / r	f / mid. / r

1 U mounting bracket

With the 1 U mounting brackets, power strips can be mounted sideways onto the centre rail.

1 U mounting bracket	Order no.
1 U	6782500
2 U	7782600

482.6 mm (19") mounting angle support (for rectangular tube)

This rectangular tube can be inserted into the side of the cross support to provide the for 482.6 mm (19") mounting angles with additionally stability when accommodating heavy components. The combination of cross support/depth stay and rectangular tube can increase the load bearing capacity of the 486.2 mm (19") mounting angles to 1000 kg.

Rack width (mm)	Order no.
800	6943100

Shelf, fixed (not 482.6 mm (19"))

Depending on rack dimensions, the shelves are mounted with the shelf supports - which must **be ordered separately** (see page 77) (depth stays for 600 mm width) - directly onto the SP Rack framework in the 25 mm pitch pattern. Shelves of varying depth can be used. 482.6 (19") installation is only partially possible.

Material: 1.50 mm sheet steel
 Finish: powder coated in RAL 7035
 Static load capacity: 75 kg
 Delivery comprises: 1 shelf

For rack width (mm)	Shelf width (mm)	Shelf depth (mm)	Order no.

	7100800

Flange plate with active fans

The flange plate with active fans can be installed in place of the brush strip, if required.
 Deliver comprises: 1 flange plate with two active fans, fixing accessories
 Technical Data:

- Air-volume flow rate per fan (free blowing): 50/60 m³/h
- Operating voltage: 230 V 50/60 Hz
- Power consumption: 14.5/14 W
- Noise level: 35 dB(A)

Flange plate with fans	Order no.
	7100700
schuko C 13 mains cable	6763200

Cable support rail

The cable support rails cable support rails enable the structured clamping and strain relief of cables routed along the rack width by means of cable clamps and/or fasteners.

Material: 1.5 mm sheet steel

Finish: galvanised

Delivery comprises: cable clamping rails, fixing accessories

Housing width (mm)	Order no.
570	7110150

482.6 mm (19") mounting angles

For the depth variable installation of two 482.6 mm (19") components in the rack rear plane. The angles are mounted directly onto the housing. The additional positioning perforations in the height unit pitch pattern make installation easier.

Material: 1.50 mm sheet steel

Finish: galvanised

Delivery comprises: 2 x 482.6 mm (19") mounting angles, fixing accessories

Height units (U)	Order no.
6	7100060
9	7100090
12	7100120
15	7100150
18	7100180
21	7100210

Slim line fan

Technical data:

- Operating voltage: 230 Volt
- Air volume flow rate: 165 m³/h
- Nominal output: 25 Watts
- Max. noise emission: 1 fan 45 dB(A) free blowing
- W x H x D (mm) 120 x 120 x 120
- 2 protective grilles
- 100 mm mains cable with IEC C 13 plug

Slim line fan	Order no.
	7719400

IT Enclosures

See also general system accessories from page 88

Shelf (not 482.6 mm (19")), pull-out (standard only)

The pull-out shelves are mounted with the telescopic rails directly onto the framework in the 25 mm pitch pattern. Dimensions: width 466 mm, depth 600 mm
Material: 1.25 mm sheet steel
Finish: powder coated in RAL 7035 light grey
Static load capacity: 50 kg
Delivery comprises: 1 shelf, 2 telescopic rails, fixing accessories

Shelf, pull-out	Order no.
	6749500

Shelf, fixed installation

Depending on the rack dimensions, the shelves are fixed to the IT Enclosure directly using **the depth stays, which must be ordered separately** (see page 77).
Static load bearing capacity: 75 kg
Delivery comprises: 1 shelf

Shelf, fixed installation	Order no.
	6745500

Rack trolley, galvanised (for PC case basic/comfort)

Can be retrofitted on IT Enclosures, with castors or levelling feet.
Material: 2.00 mm steel sheet
Finish: galvanised
Static load bearing capacity: 200 kg
Delivery comprises: 1 rack trolley

Rack trolley, galvanised	Order no.
with castors	7530800
with levelling feet	7530900

Shelf, fixed (for PC case basic/comfort)

The shelf is attached to the 25 mm pitch pattern by means of mounting hooks.
Height can be varied as required.
Dimensions: width 635 mm, depth 500 mm
Material: 1.00 mm steel sheet
Finish: galvanised
Static load: 40 kg
Delivery comprises: 1 shelf, 4 mounting hooks

Shelf, fixed	Order no.
	7471500

Shelf, pull-out (for PC case fokus)

The pull-out shelf is mounted on shelf supports and telescopic rails and fixed directly onto the framework mounting holes.
The shelf is height adjustable in a 50 mm pitch pattern.
Dimensions: width 493 mm, depth 500 mm
Material: 1.50 mm sheet steel
Finish: powder coated in silver grey
Static load capacity: 50 kg
Delivery comprises: 1 shelf, 2 shelf supports, 2 telescopic rails, fixing accessories

Shelf, pull-out	Order no.
	7474500

Active ventilation set with one fan (for PC case basic/comfort)

The ventilation unit is intended for retrofitting to the rack rear wall.
Material: 1.25 mm steel sheet
Finish: powder coating RAL 7035
Delivery comprises: 1 fan set, 1 fan power cable, fixing accessories

Fan technical data:

- Operational voltage: 230 V
- Nominal output: 22/21 W at 50/60 Hz
- Air-volume flow rate per fan (free blowing): 118m³/h
- Max. noise emission: 36 dB (A)

Active ventilation set with mains cable	Order no.
	7483000

Active ventilation set with 2 fans (for PC case fokus)

The fan unit is intended for retrofitting to the rack rear wall.
Material: 1.25 mm steel sheet
Width: 330 mm, depth: 80 mm, height: 270 mm
Finish: powder coating RAL 7035
Delivery comprises: 1 fan set, 1 fan power cable, fixing accessories

Fan technical data:

- Operational voltage: 230 V
- Nominal output: 14/13 W at 50/60 Hz
- Air-volume flow rate per fan (free blowing): 118m³/h
- Max. noise emission: without noise reduction, 43 dB(A), with noise reduction, 39 dB(A)

Active ventilation set	Order no.
2 fans	7484500
2 fans with thermostat and noise reduction	7485500

Fan mains cable (2.0 m)

For connecting fans to the main power supply.

Technical data:

- Cable 3 x 0.75 mm², length, 2.0 m, with schuko angled plug and coded wieland connector

Fan mains cable (2.0 m)	Order no.
	7763100

General Accessories

1 U fan tray with speed controller and temperature display

Speed and temperature controller with plain text menu, temperature-dependent infinitely variable speed control, mains connection via IEC plug, relay alarm output and sensor: 2-pole plug, LC display (LCD)
 Delivery comprises: fan tray with 3, 6 or 9 axial fans, Mains supply cable, 230 V, Temperature sensor with 1.5 m cable

1 U fan tray	Order no.
3 fans	6670510
6 fans	6670520
9 fans	6670530

Fan filter/Exhaust filter

The best solution for thermal problems. Operation can be changed from blowing to suction simply by turning the fan motor round.
 Material: plastic, in accordance with UL94V0, self extinguishing
 Colour: RAL 7035
 Delivery comprises: 1 filter fan/Exhaust filter, fixing accessories, C 13 adapter cable
 Protection rating: IP54

Fan filter

Order no.	7680000	7680500
Dimensions (mm)	148 x 148 x 64,5	250 x 250 x 126
Operating voltage	230 V 50/60 Hz	230 V 50/60 Hz
Current consumption	0,11 A	0,3 A
Power consumption	19/18 W	45/39 W
Rotation speed	2650/3100 min ⁻¹	2760/3030 min ⁻¹
Temperature range	-10 °C to +55 °C	-10 °C to +55 °C
Life span	27500 h	40000 h
Sound level	42 dB (A)	52 dB (A)
Aeration capacity (free-blowing)	63 m ³ /h	250 m ³ /h
Dust absorption (10 µm)	85 %	85 %
Approvals	CE, UL, CSA	CE, UL, CSA

Exhaust filter

Order no.	7681000	7681500
Dimensions (mm)	148 x 148 x 26	250 x 250 x 35

Thermostat for fan control, fully wired

Deliver comprises: 1 thermostat, 1 thermostat support, 1 connecting box, fixing accessories
 Technical data:
 ■ adjustment range: 0 – 60°C +/- 2k
 ■ max. switching capacity: 6A/230 V AC
 ■ interference suppression class: N
 Protection class: IP30, approval: CE in acc. with VGB 4 (Mains cable must be ordered separately.
 May possibly be included in delivery of rack or fans)

Thermostat for fan control	Order no.
	6763000

Mains cable, length 2 m	Order no.
D	6763200
F/B	6763210

T-grooved mounting rails

For the installation of 482.6 mm (19") components at infinitely variable heights. Please order installation kits and M6 spring nuts separately.
 Material: aluminium extrusion profile
 Finish: chromed
 Deliver comprises: 2 T-grooved rails, fixing accessories

Rack height (mm)	Height units (U)	Order no.
1200	24	6785500
2000	42	6787000
2200	46	6788000

M6 spring nuts for T-grooved mounting rails

The spring nut is inserted into the T-groove, after the latter has been installed, to guarantee the secure, height adjustable installation of components.

Material: steel

Finish: galvanised

Delivery comprises:

50 M6 spring nuts, 50 bolts M6 x 10, 50 plastic washers

M6 spring nuts	Order no.
	7787500

Mounting kit, 482.6 (19")

For mounting 482.6 (19") components.

Delivery comprises: 50 M6 cage nuts,

50 M6 x 16 oval head screws

50 plastic washers

Mounting kit	Order no.
M5	7963200
M6	7963000

Set of screws

For mounting components onto the frame profiles.

Delivery comprises: 20 self-tapping screws

Set of screws	Order no.
	7963100

482.6 mm (19") 2 U shelf, fixed or pull-out

The shelf can be installed in all SP Racks which already have 482.6 mm (19") mounting angles.

Dimensions: 482.6 mm x 2 U x 400 mm

Material: 1.50 mm sheet steel

Finish: powder coating

Static load capacity: 40 kg (2 U)

Delivery comprises: 1 shelf, 1 pair of telescopic rails (for pull-out version), fixing accessories

482.6 mm (19" x 1 U) shelf, fixed

Dimensions: 482.6 mm x 1 x 250 mm

Static load capacity: 15 kg

RAL 7035 (light grey)

2 U version:	Order no.
Fixed	6750000
Pull-out	6750500

RAL 9011 (black)

Pull-out	6750550

RAL 7035 (light grey)

1 U version:	Order no.
Fixed	7750250

482.6 mm (19") shelf

The 482.6 (19") shelf for fixed installation, with passive venting, is mounted in the pitch pattern of the front and rear 482.6 (19") mounting plane.

Material: 1.00 mm sheet steel

Finish: powder coated in RAL 7035

Static load capacity: 120 kg

Delivery comprises: 1 shelf, fixing materials

Can be used in racks of all manufacturers

Installation dimensions of 400 to 850 mm

RAL 7035 (light grey)

Width (mm)	Depth (mm)	Order no.
448	400	6550400*
448	500	6550500

Cable support

Safely guides the connection cables from the pull-out shelf to the framework.

Material: sheet steel
 Finish: galvanised
 Delivery comprises: 1 cable support, fixing accessories

Cable support	Order no.
	7790100

Mounting plate

With the 42 U mounting plate, any non-482.6 mm (19") components can be installed in 2000 mm high SP Racks. The plate itself is mounted between the 19" mounting angles and can be positioned in the rack at any required depth. Should any additional 482.6 mm (19") mounting angles be required at the front of 800 mm wide SP Racks, they must be mounted using cross supports.

Material: 2.00 sheet steel. Finish: galvanised
 Delivery comprises:
 for 600 mm width: 1 mounting plate, fixing accessories
 for 800 mm width: 1 mounting plate, fixing accessories

Should the rack contain no 482.6 mm (19") mounting angles, two sets of depth stays (see page 77) must be ordered separately

Rack width (mm)	Order no.
600	6791000
800	6991000

482.6 mm (19") swing frames

Swing frames for installing 482.6 mm (19") components over the entire height of 800 mm wide SP Racks/PX Racks provide optimum access from the rear. The frames are installed in the rack as retrofit components slightly off-centre.

With T-handle.

Material: 1.50 mm sheet steel

Finish: powder coated in RAL 7035

Delivery comprises: 1 x 482.6 mm (19") swing frame, 1 installation kit, fixing accessories.

1 U and 2 U shelves can also be installed in the swing frame (see page 89)

For the rack with the swing frame, there is a separate glazed door available, in which the pane is installed asymmetrically (see page 77, SP Rack doors)

Swing frames

Rack height (mm)	Height units (U)	Order no.
2000	40	6992000

General Accessories

Cable routing tile for raised floors

Cable routing tile as a seal for installation in the raised floor, in two parts.

Usable cable aperture: 203 x 102 mm

Dimensions: (L x W x H) 279 x 210 x 41 mm

Material: plastic

Delivery comprises: Cable routing tile, 2-part

Cable routing tile for raised floors	Order no.
	7963800

Chassis rails (depth adjustable)

The slide rails can be extended to the required length and screwed into place between the front and rear 482.6 mm (19") mounting angles. The component for installation is pushed onto the rails and fixed into place. Can be used in racks of all manufacturers! Use of lower height units is limited (-2 mm).

Length: min. 540 mm, max. 750 mm

Load capacity: 100 kg

Contact area: 28 mm right/left

Material: steel sheet, galvanised

Delivery comprises: 2 slide rails, fixing accessories

Chassis rails (depth adjustable)	Order no.
	777200

Cable clips

For attachment to C-profile rails to enable the clamping and guiding of cables by means of cable ties.

Material: PA

Delivery comprises 4 clips

Cable clip	Order no.
	7760000

Equipotential earthing bar

For retrofitting horizontally or vertically in the framework's 25 mm pitch pattern.

Material: 12 x 5 mm copper rail

1 equipotential earthing bar, 2 isolators, 5 feeder terminals 1.5 – 16 mm², fixing accessories

Horizontal installation for rack width (mm)	Order no.
600	7760200
800	7760100

Additional feeder terminals	Order no.
UPP = 10	7765000

Vertical installation for rack height (mm)	Order no.
2000	7760300

Central earthing point	Order no.
	6760100

Door contact switch for 0.5 U lamp

Door contact switch with 1.5 m cable and angled plug for the lamp outlet socket

Door contact switch	Order no.
	7763700

Interior lamp 0.5 U

Interior lamp for direct installation on the 482.6 mm (19") angle, including switch, socket-outlet box and 3 m power cable.

Delivery comprises: 1 interior lamp, 0,5 U

Technical Data:

- 8 W/230 V (fluorescent tube), 6 W/230 V (LED)
- Approval: CE, ENEC, UR
- (L x W x H) 448 x 545 x 26 mm
- Magnetic fastener, screw fasteners or clip-on horizontally on 19" pitch pattern

Interior lamp 0.5 U	Order no.
8 W fluorescent tube	7764100
6 x 1 W LEDs	7764200

Interior lamp, comfort

This multi-purpose not only provides perfect lighting, but also serves as a „plug & play“ distribution and connection device for door contact switch, thermostat and fan. The space-saving interior lamp is screw fastened and can be mounted both horizontally and vertically on the SP Rack's 25 mm pitch pattern, or as an alternative, attached magnetically to any sheet steel surface (magnetic attraction force: approx. 10 kg)

Dimensions: (L x W x H) 225 x 88 x 44 mm

Material: 1.00 mm sheet steel

Finish: powder coated in RAL 7035 (smooth finish)

Delivery comprises: 1 Comfort interior lamp, 1 power cable (2 m) with socket and dual earthing two-pole schuko plug, fixing accessories.

System interfaces:

- 1 socket for 230 V supply lead
- 1 coded two-pole jack for thermostat, daisy chain wiring
- 1 coded three-pole jack for fan
- 1 coded two-pole jack for door contact switch
- Integrated front side switch (On/Off door contact switch)

Technical Data:

- Input voltage: 230 V / 50 Hz
 - Input current: 50 mA
 - System: 6 W
- Integrated electronic self ballast

Interior lamp, comfort	Order no.
Comfort interior lamp with screw fasteners	7841000
Comfort interior lamp with magnetic fastener	7841100
Light bulb	7841500

General Accessories

Thermostat and door contact switch for interior lamp, comfort

Thermostat

The thermostat enables the fan and the door contact switch to be connected to each other and to the power supply simply and professionally. Retrofitting is also possible.

Delivery comprises: 1 thermostat with a 1 m lead and plug, fully wired, 1 mains cable (2 m), 1 mounting kit, fixing accessories

Technical data:

- Adjustment range: 0 – 60° +/- 2k
- Max. switching capacity: 6A/230 V AC
- Noise depression class: N
- Protection class: IP20

Door contact switch

Is connected to the Comfort interior lamp.

Delivery comprises: 1 door contact switch with 0.5 m lead and connector plug, fully wired, 1 mounting kit, fixing accessories

Technical data:

- Continuous current: 10 A/500 V AC
- Protection class: IP68

Thermostat	Order no.
	7841200

Door contact switch	Order no.
	7841300

Varnish applicator

For touching up or repairing damage to the powder coated finish. Volume: 12 ml

Colour	Order no.
RAL 7035 (light grey)	7999000
RAL 9005 (black)	7999050

482.6 mm (19") adhesive tape measure strip for mounting angles

Numerically marked in inches to indicate height units. Numbered from top to bottom or vice versa.

Material: self-adhesive transparent foil
Delivery comprises: 2 rolls of tape

Self-adhesive tape measure strip	Order no.
47 – 1 U	6699200
1 – 47 U	6699400
1 – 47 U from top to bottom	6699500

TFT console

Efficient server management in 19" racks

- 17" LCD monitor
- Resolution: 1280 x 1024 (SXGA)
- Brightness type 300 cd/m²
- Contrast type ratio 500:1
- 16.7 million colours
- On Screen menu
- Approvals: CE, FCC
- Dimensions (W x D x H): 482 x 490 x 44 mm
- 2 telescopic rails
- Max. rated power: 30 watts
- Power consumption in standby < 1 watt
- Touchpad with integrated mouse keys and scrolling function
- Touchpad with integrated number block (88 keys on German version)

TFT console 17"	Keyboard	Order no.
Colour light grey, RAL 7035	D	7545500

Spare key for door (SP, NT Box, Slimline)

Lock type: EMKA 333
Delivery comprises: 1 key

Spare key for door	Order no.
	7999500

Spare key for side panel

Lock type: EMKA 2233X
Delivery comprises: 1 key

Spare key for side panel	Order no.
	7799500

Installation set for profile half cylinder lock

For retrofitting DIN 18252 profile half cylinder locks in pivoted handles.

Delivery comprises: 1 installation set, fixing accessories

KaBa cylinder type 1036 can be installed.

Installation set for profile half cylinder lock	Order no.
	7590600

General Accessories

3 U power box

For switches, one-way switches or power strips on frameworks or scaffolding. Up to 22 modules with 18 mm wide can be connected. DIN rail mounting rail has a depth adjustable range of 15 mm. The box is equipped with two 10 x 8 mm earthing rails. Cable entry aperture 400 x 35 mm with brush on rear side.

Length: 120 mm with 15 x M5 inlets

Material: 1.5 mm steel sheet

Finish: RAL 7035

VE: 1 piece

3 U power box	order no.
	6670540

Power supply strip, D model

Depending on the model, the power supply strips can be installed in the 482.6 mm (19") angle or either vertically or horizontally on 25 mm pitch pattern of the framework. The plugging direction can be varied by turning the end of the strip by 90°. The Schuko receptacles are integrated into the strip at an angle of less than 35°, allowing the use of angled plugs. The strip's low installation height of only 1 U minimises the loss of space on the 482.6 mm (19") angle. Material: aluminium extrusion profile, plastic in acc. with UL94VO

Colour RAL 7035

Delivery comprises: 1 power supply strip with a 2 m lead (3 x 1.5 mm²) and Schuko plug depending on the model, fixing accessories.

Technical Data (depending on model)

- Design in acc. with DIN 49440 and CEE F/III, operating voltage 240 V
- Overvoltage protector tested in acc. with DIN VDE 0675, part 6/A1/A2 requirement class D, Uoc varistor temperature monitoring, visual operation monitoring, nominal current capacity per conductor 6.5 kA, deflector voltage 250 V/50 Hz
- 10 A noise suppression filter in acc. with DIN VDE 0565, part 3/5.86
- Transient protection

W: Rocker switch

EÜ: Overvoltage protector and noise suppression filter

Intelligent power strips

This network capable (TCP/IP) PDU manages the power distribution in your rack.

Technical Data (depending on model):

- Group-based fuse protection, with melt fuse or auto-reset
- Current measurement on group or phase
- Monitoring ambient parameters (optional)
- IP access, security and communication, web interface, SSL, SSH, Telnet, SNMP and RS-232 access, 10/100 Base T-Ethernet, SMTP/e-mail and Syslog
- Control of individual output receptacle

Certifications:

European Union acc. to EN 60950-1:2001
EMV-EN 55022 Class A, EU 5502

Power Control, 1 U, power strip with integrated functions for measuring current, voltage, output, phase angle, frequency and energy

Aluminium profile 1 U, natural anodised, approx. 450 mm in length with specifications as follows:

- Plastic end face and receptacles in grey
- 230 V power supply via the right/lower end face by means of a fixed HO5VV-F 3G 1,5 mm² 2 m mains cable with angled schuko plug
- With integrated current/output meter (allowing for phase shift) -> 0–16 A, 3-digit ampere display
- Measuring range from 0.1 – 16 A
- Fully insulated power inputs in acc. with low voltage directive accuracy class 1
- **8 IEC C 13 sockets**, black or **6 Schuko sockets**, 35° angled, grey
- With optional locking for C 13
- Delivery includes 2 brackets for mounting the power strip horizontally/vertically on/in the rack

Type	Order no.
6 outlet schuko	7770650
8 outlet IEC C 13	7770660

Switchable 24-outlet C 13 power strip, 32 A (SNMP)

- 24 IEC outlets, each with 10 A capacity, divided into 3 groups of 8 x C 13
- Each group of 8 protected with 16 A fuse
- Overall capacity 32 A
- Connector cable length 2m
- CEE 32 A socket, 3-pole blue, or CEE 16 A 5-pole, red
- Status Led red/green (switch on/switch off) per port
- Status LED for fuses
- ON delay can be individually set for each port (1 sec. – 30 min.)
- Soft start (after PowerOn, ports switch on gradually with time delay)
- Memory function (after PowerOn, ports will assume on, off or last status)
- Batch function (each port can be switched off and restarted automatically after x seconds)
- Control via Ethernet, HTML and script
- All ports can be switched by hand on the device itself, also in the event of power failure
- SNMP 1 and 2.c, Syslog functionality
- Password protection for user/admin and IP ACLs (firewall)
- Can be updated via Ethernet, also when in operation (port status remains unchanged)
- Mounting holes in 25 mm pitch pattern
- 1 U, overall length 1500 mm, depth only 60 mm

Type	Order no.
Switchable 24-outlet C 13 power strip, 32 A 3-pole, L/N/PE (SNMP)	7771600
Switchable 24-outlet C 13 power strip, 3 x 16 A 5-pole L ₁ /L ₂ /L ₃ /N/PE (SNMP)	7771610

Modular Rack Management System

Multifunctional modular monitoring system for server rooms and data centres

The 8-port module is attached onto the side of the CPU module and provides 8 connector ports for universal application

The CPU module is the communication unit which processes the information from the port modules and passes it on by SNMP via data networks

The concentrator is used in large-scale applications (building control systems, industrial environments, large-scale data centres). It serves as a consolidation point for high density installations

Plug connectors to neighbouring modules provide the required electricity and data line links. Simply connect sensors/actuators with RJ45 plugs*) to the rear side, whether digital or analogue, input or output
*) 8-port module is also available with a clamp connector

Benefits:

- Modular design to suit customer requirements
- Integration in existing infrastructures
- Scalable
- Multifunctional and universal
- No software installation required
- Access via web browser
- Hot plugged
- 1 U
- Fast configuration

Article no. on request!

Simply slot together and secure with a cross support (for wall/table mounting)

CPU and 8-port module with Bracket for rack mounting

Rack Management System

Rack management system

Complete security for computer centres and racks

The rack management system serves as an intelligent network agent for monitoring all environmental influences on network, switch and server racks in computer centres, on campus and in external locations. All monitored environments can be evaluated accordingly and necessary control operations carried out. In reaction to particular events, alarm messages are generated automatically and/or switching operations triggered. The RMS is operated via SNMP or a web browser. Private MIB allows the RMS to be integrated in all common network monitoring systems. The RMS is an autonomously functioning system and secures the operation of the entire electronic data processing system. All results can be recorded and evaluated as required.

All features at a glance

- Stable, high-availability operating system (Linux)
- Extensive range of sensors for all usual environmental influences
- Compatible with other sensor technology due to analogue input channels
- Internal power supply for all sensors (no additional mains adapter required)
- Programmable filter system for the realisation of any alarm conditions
- Operation and configuration by SNMP, http.
- Alarm messages by LED, buzzer, switching outputs and network management (SNMP traps)
- Compatible for all usual network management platforms
- Integrated user administration (password-protected)
- Optional access control (keypad, chip card, GSM)
- Update function

Uninterruptible Power Supply Systems

Line interactive

Line interactive technology with buck-boost function and sinusoidal output voltage

- Combined rack-tower model, only 2 U
- Scalable stored energy time (from ZINTO A 1500)
- Hot-swap battery: intelligent battery management, self test and quick-charge system
- Selectable input and output voltages – generator-compatible
- Overvoltage protection for telephone and data lines
- Hot standby capable, raises operational reliability for servers with redundant mains adapters
- USB and RS-232 interfaces, potential-free contacts, emergency OFF
- Slot for optional interface cards (AS400, SNMP/network, relay contact, etc.)
- Includes DataWatch shut-down, management and monitoring software
- 2 years warranty with immediate warranty replacement

Accessories

- Rack mounting rail for ZINTO A series: compatible with racks of all manufacturers, due to variable length of 465 – 865 mm, max. load 68 kg, dimensions in mm (W x H x D): 490 x 75 x 50, **art. no. 6591330**
- Rack mounting kit for ZINTO A 800/1000: for mounting in 19" rack, excluding rack mounting rails, which must be ordered separately if required, dimensions in mm: (W x H x D): 500 x 95 x 280, **art. no. 6591340**
- Rack mounting kit for ZINTO A 1500/1500BP/2000/2000BP: for mounting in 19" rack, excluding rack mounting rails, which must be ordered separately if required, dimensions in mm: (W x H x D): 500 x 95 x 65, **art. no. 6591350**

Double-phase transformer

Double-phase transformer technology, classification VFI-SS-111

- Double-phase transformer technology, classification VFI-SS-111
- Combined rack-tower model
- Extremely quiet due to regulated high-performance fan
- Black, attractive design also suitable for office environment
- Hot-swappable battery: conversion without interrupting operation
- Scalable stored energy time due to extreme battery packs
- Selectable input and output voltages –generator-compatible
- Hot standby capable, raises operational reliability for servers with redundant mains adapters
- Rack mounting rail, **art. no. 6591320**
- RS-232 interface and potential-free contacts
- Slot for optional interface cards (AS400, SNMP/network, relay contact, etc.)
- Includes DataWatch shut-down, management and monitoring software

Temperature and humidity controller

- 4 x RJ11 sensor connections for temperature/humidity
- Status LEDs
- Temperature measuring range
- Humidity measuring range
- Application areas: floor, table, rack/furniture-mounted, wall-mounted
- International mains adapter 110/230 V AX
- Power consumption: 2.5 VA
- Dimensions: 130 x 90 x 30 mm
- Weight: 350 g
- Network: 10 MBit, RJ45
- Protocols and standards: http, dhcp, smtp, snmp
- Operating temperature: +5° C to +40° C

Delivery comprises:
 1 housing with electronic accessories
 1 mains adapter
 1 temperature sensor -10° C to +70° C
 1 data cable
 1 software CD
 1 set of operating instructions

RMS 200	Order no.
RMS 200	6670420
Temperature sensor, -10° C to +70° C	7580400
Humidity sensor	7580500

1U Speed and temperature controller

LC display (LCD) with plain text menu.
 Temperature-dependent infinitely variable speed control.
 Mains connection via IEC plug.
 Relay alarm output and sensor: 2-pole plug

- Technical data:
- Operating voltage: 110 – 240 Volt/50 + 60 Hz
 - Power consumption, max.: 250 W (max. load)
 - Max. switching capacity: 10 A
 - No-load loss: ~ 1 W
 - Alarm output: 1 changeover, 24 V UC – 5 A (max. 48 V – 10 A)
 - Fuse: M 1.6 A – 250 V (5 x 20mm)
 - Temperature range: +5° C to +60° C
 - Switching range: +5° C to +60° C
 - Temperature units: ° C and ° F, adjustable
 - Switching differential: 1° C to 5° C, adjustable
 - Temperature sensor: PTC-sensor with plug (KTY81-2)
 - Display/Switching accuracy : +/- 2 Kelvin
 - Storage of minimum and maximum recorded temperatures, reset possible

Dimensions:
 Installation depth: 210 mm
 Width: 19" (housing: 437 mm) height: 1 U

Equipment/Delivery comprises:
 Speed and temperature controller
 Mains supply cable
 Temperature sensor with 1.5 m cable
 1 data cable, 1 software, 1 operating manual

1 U Speed and temperature controller	Order no.
	6670500

Space-saving fire protection for server racks

Data processing, server or switchgear racks are among the most important technical equipment in any company. They are responsible for managing internal data flow or controlling manufacturing processes and yet, more often than not, these racks are positioned inaccessibly or are insufficiently integrated into existing security systems. The new **TITANUS RACK-SENS®** can put an end to this situation.

- Can be installed vertically
- Plug and play
- Easy-to-handle, space saving 482.6 mm (19") module
- Integrated air-sampling smoke detection system
- Available in 1 U or 2 U
- Extinguishing media: Novec 1230
(non-conductive, leaves no residues, direct use on open flame results in formation of acid)
 - 1 U version with external extinguishing gas cylinder
 - 2 U version with integrated extinguishing gas cylinder
- VdS (German fire safety inspection institute) approval (1 U)
- Network (Ethernet ISNMP)
- Certified Microsoft server management interface

Designed for:

- Network and server racks
- Telecommunications racks

Article no. available on request!

- Can be used universally
- Can be mounted on any SP54 Rack
- Light grey RAL 7035

Roof mounting air conditioner

Roof mounting air conditioner		WxHxD (mm)	Order no.

More information?

SCHÄFER IT Systems, innovative manufacturer of made-to-measure network and cabinet solutions for both conventional and complex applications, is part of the internationally successful company SCHÄFER WERKE.

The owner-led group of companies has its headquarter in Neunkirchen in Germany's Siegerland region. The work of all the SCHÄFER WERKE divisions – SCHÄFER IT Systems, SCHÄFER Industrial Solutions, SCHÄFER Interior Systems, SCHÄFER Container Systems, SCHÄFER Perforated Metal, EMW Steel Service Centre – is based on high-quality fine steel sheet. The processing of this material is one of the core competencies of this enterprise.
